Loved this game when it first came out, but cannot recommend it now. It is ruined by all the Stardock crap you have to go through in order to even just open it.

Don't bother purchasing this, but it's still worth getting if you can work around the account creation aspect... if you know what I mean.. Love this game, aliens are too op though and multiplayer with bots could get some more adjustable settings. one player mode sucks. you know you're playing against AI for real. that's not human reflexes..... Quis fazer logo essa avaliação antes que acabem as promoções e evitar que alguém perca esse joguinho hehehe. Eu sou fã de puzzles e matches 3, então joguei outras versões do Luxor nos consoles no passado, sempre gostei do título. Comprei este aqui na Steam porque estava em promoção e era o único que eu tinha visto com suporte para controle. Este é um daqueles casos de jogos que passam despercebido por nós por acharmos que ele é apenas mais um na multidão, mas Luxor Envelopé trouxe de volta o prazer de jogar Luxor, como se nunca antes tivesse jogado. O jogo é visualmente empolgante, tem vários tipos de power-ups desbloqueáveis e o mais legal: Bosses. Isso mesmo, ao fim de cada estágio, um boss aparece com um quebra-cabeça diferente para você resolver e vencê-lo. Achei essa ideia ao jogo fantástica e tudo a ver com o visual futurista e si-fi. É um jogo que joguei por muitas horas ainda, com certeza. Valeu cada centavo.. Designed to squeeze money. Extremely boring gameplay (at least in the first few hours). Client also has a few really annoying bugs / flaws like (for example) that you can't drag the scroll bar in windows and scroll speed is extremely slow. There are much better TCGs out there, for example duelyst and shadowverse.. Littered with spelling errors, flawed logic and annoying art. Do not recommend.. Very nice riichi implementation! Awesome that it has multiplayer and optional rule sets.. Lovely rendition of early Zachtronics magic-themed masterpieces (pre-Spacechem, not on Steam). Fans of the kind of programming that makes Zachtronics games so engrossing (Spacechem, Infinifactory, TIS-100 and Shenzhen IVO) should feel quite at home here, so I am wondering why this game passed under the radar so far (I found it randomly in my new game queue). Tutorials are very well done and gradually introduce to the various tools, with some levels within the guided tutorial that act a bit like a test to check understanding so far.

Thumbs up then, and let's hope that more of these games will be coming because there's never enough!

Reminiscent of Amnesia. Full of creepy atmosphere and haunting visuals.

Positives:

- + Imaginative hellscape.
- + Pretty fast loading times.
- + Accurate representation of Salt Lake City, Utah.

Negatives:

- Random framerate drops. (50 drops to 10 fps on a HD 4400 Graphics card.)
- Sluggish mouse movement. Turning and stopping seems delayed. (Turning off V-Sync fixes this.)
- Accurate representation of Salt Lake City, Utah.. The game is good, but I can't really understand what is happening.. You should be afraid of tanks, in this game you're not... you grind all the time for a tank until you get destroyed by one single AT soldier hiding in the forest while you do not have any kind of zoom on your tank to see him whatsoever.. 9 shots from the forest and your tank is gone with an AT Rifle.. which keep in mind only were able to destroy light tanks... 10/10 grindfest if u love tanks and if you get a tank you're underpowered.. noone plays it, i woulda bought it for 99 cents if i hadv known it would become so un played. Plus theyve given up on developement, the helicopter bug has been around for nearly 3 years.(thats how long ive had the game, it might be more than that, idk)

if you dont have it, dont buy it.. 11 of ~69 in my "How many games can I get for under \$5" review series.

The blasé sotry and stick figure graphics led me to dread playing this game. I could not get into it. The gameplay is interesting and all, with a mixture of stealth and rampage missions to satisfy many different types of players. I couldn't bring myself to put too much time into it though. It felt like my life was being sucked away from me.

Have you ever played a game that felt less like a game and more like a huge waste of time. That's the only way I can describe this. I don't think I've had to recommend against something for having taste this bad in a while. The game mechanics are sound, it's just bad.

If you don't value your time, get this on sale.

If you do value your time, I have to say avoid it at all costs..\\u00b4\\u00afV).....(\\u00af\\

Firstly- It's a fun game, secondly its not the best game. It's an indie game so dont whine too much. Its not bad. Having said that. It is a game ported from a mobile game sothere is bound to be issues.

Pros

Its exactly like the mobile game as in it is exactly liket he mobile games minus the dlc. in the mobile game the dlc are something you have to buy kromium to get. Here at least you just have to buy the the dlc and you get the titans. Its for casual gamers. Dont think of spending hundred sof hours into it. Seriously its just a casual gaming game. If you want to grind by all means but its better playing it, stopping doing other things then when you feel like it go back to it.

Cons

Its exctly like the mobile game. I mean come on at least change it up a bit its suppose to be in the computer. Try out better graphics or having more ship not just use the exact same game and just port it to the pc. THE fact you have to grind like hell just to get things. Like seriously no to grind, a little bit is okay but to spend mroe than a few minutes just to afford a new shp or a new weapon thats given at random is freaking insane.

Having said that have fun and give it a try
